

For Immediate Release

From the people of Iran to the people of the United States:

During the last 42 years the Islamic regime has run a tyranny of mass killings, executions, corruption, poverty, child abuse, and gender apartheid against the people of Iran. Their atrocities, to expand their power, countries have been decimated, millions have lost their homelands and become refugees, and hundreds of thousands of humans have been killed by these fake men of God, who have been kept in power by the policies of “Diplomacy”, meant to prevent the Islamic Revolutionary Guards Corps’ access to Nuclear Bomb.

History has proven that Diplomacies have never prevented dictators’ access to nuclear bomb, they have just delayed them. The dictatorial regime of the fake men of God is “not reformable”, evidenced by their history. Diplomacies with them have fomented more wars, destructions of the cities, countries, tribes, and killings of Christians, Yazidis, Zoroastrians, women and children, not counting all the lives of American soldiers killed in Iraq.

The recent treaty that China is entering into with Khamenei will give them economic and political control of the world. China needs energy as in Iranian oil and gas, but Xi Jinping wants the control of the Persian Gulf, not only the energy sources, but to take over the US control of the region.

We the citizens of Iran are a proud ancient civilization; rooted on respect for human rights, equality and dignity of all people. However, during the last 42 years we, the citizens of Iran, have been isolated from the International Community, as if we do not exist. As Iranians we want to go back to our civilization and live in peace and friendship. We want to live free from discrimination against our fellow citizens; we want our children to attend schools not labor. We are against gender apartheid, religious discrimination, and dictatorial rule. We want to live in the “secular” democratic Iran. And, it is time that we take back our country and our respect in the world.

If peace and prosperity is important to the people of Western democracies, if the American people want an Iran without the danger of nuclear bomb here is our request:

Please, Mr. President; put an end to 42 years of appeasement policies, entitled “Diplomacy”. No more meetings and negotiations with Mr. Zarif. Lead the policy of Globalization of Human Rights, in the United Nations. It is time for the UN structure to go back to what Ms. Eleanor Roosevelt intended UN to stand for.

We also invite the Western media to please stand by the peace loving, freedom seeking Iranian people. Instead of giving Zarif a platform, speak to Iranian opposition leaders. Report the truths about the crimes that the fake men of God have been committing against humanity during the last 42 years.

The Iranian Democracy Front is the collection of numerous freedom seeking political organizations
