

## **Press Release: For Immediate Release**

### **To the countries which seek to colonize Iran by entering into treaties with the corrupt Islamic Regime in Iran**

Iran does not belong to the mafia of mullahs; it belongs to its people. We, the Iranian People warn you that we will not accept, forget nor forgive your attempts to weaken our national struggle for freedom and to undermine our national sovereignty.

There are approximately eighty-five million Iranians living within and seven million living outside the country. A distinct and indisputable majority constitute a devoted, well informed, very engaged and powerful force dedicated to eradicating the inhuman and corrupt mullahcracy in Iran. The inevitable success of our ever-growing force will determine not only the future of Iran, but will also impact the future of the Middle East, and Asia as a whole. We are the same people whose forefathers fought for and succeeded to achieve political and social change; democracy and modernism some one hundred and fifteen years ago. Iran is the first country in Asia (well ahead of Russia, China, Japan and Turkey) and ahead of many European countries that established a constitution devoted to the growth of democracy and envisioning a representative system of government.

Currently, with the sanctions dooming most of the nefarious and corrupt dealings and money laundering by the mullahs and their progeny, the mullah regime has now resorted to the sale and parceling of Iranian land, natural resources, ports and waterways to Russia and China, all in an effort to maintain its fragile power, to buy more time, and to amass more deadly means of slaughtering the people in the next inevitable uprising. Such treaties designed to benefit only Russia and China are devoid of all the requirements necessary to render them legal and binding under the applicable international laws. The characteristics rendering these treaties illegal and non-binding are:

***Any treaty that threatens or negates the independence and sovereignty of a country and its borders through long term treaties or through surrender of land and resources to armed foreign powers such as the Caspian Sea Treaty with Russia and the Twenty Five Year Treaty with China is illegitimate because it threatens the sovereignty of Iran and is vehemently opposed by the Iranian people.***

Considering the above, the Iranians Democracy Front, fighting to end the Islamic regime in Iran, hereby warn any country seeking to subvert the sovereignty of Iran and the independence of its people, that any such treaty is considered null and void and that a free Iran shall seek all means at its disposal to eradicate such subversive presence on its land, including seeking redress at international tribunals to hold such perpetrators accountable and responsible.

***The Iranian Democracy Front is the collection of numerous political organizations***
